

Multiple Choice

ANSWER

MULTIPLE CHOICE INSTRUCTIONS

Quick Guide:

Read each the story problem, and solve for the answer.

Find and circle the answer from the multiple choices.

Combine the letters that labeled the answers into a final word.

Antonella and Pablo work together to plant their garden. Antonella planted 18 rows, while Pablo planted 24 rows. How many rows did they plant together?

U 42	V 22	W 34	X 6	Y 38
----------------	---------	---------	--------	---------

Gabriella earned \$14 washing windows in July, and also earned \$4 washing windows in August. How much did she earn that summer?

L 10	M 8	N 14	O 56	P 18
---------	--------	---------	---------	----------------

This page reveals "UP"

Details:

1. Each page contains several story problems, with multiply-choice answers.
2. The answers are labeled alphabetically, but it might be A, B, C, D, E, or instead it might be labeled M, N, O, P, Q, or any other sequence.
3. Solve the story problem, and find the matching answer. Circle it, or at least its label letter.
4. Combine the letters from all of the problems into a final answer. Your cover page will indicate whether to look for a separate word on each page, or for a single phrase that spans across the pages.

Multiple Choice
